Why has MISA "broken" their acronym of MSVCR90 > -A (Microsoft Visual C++ Redistributable - 1990) For years they have "broken" their acronym. > -C (Microsoft Visual C++ Redistributable - 2003) For years they have never used it. MSVC9 is now called MSVC2010 and MSVC2012. > -D (Microsoft Visual C++ Redistributable - 2012) For years they have never used it. MSVC2012 is now called MSVC2013 and MSVC2015. > -E (Microsoft Visual C++ Redistributable - 2013) For years they have never used it. MSVC2013 is now called MSVC2014 and MSVC2017. > -S (Microsoft Visual C++ Redistributable - 2017) For years they have never used it. MSVC2017 is now called MSVC2019. So MSVS90 is > MSVCR90 (Microsoft Visual C++ Redistributable - 1990) Then MSVS90 always refers to MSVCR90 and MSVS90 alone refers to MSVC1990. This is a Moderately technical article. If you're looking for a simple, easy-to-learn-and-understand overview of a Windows 7 tutorial, you may want to check out our Beginner's Guide to Windows 7. Setting Processor performance, Memory speed, disk space, sound and display settings, to make the system more flexible and practical, Sunrise is a nice piece of software that allows users to speed up their PCs. The interface of the tool is very intuitive and the functions are clearly organized, so it is quite easy to use. So you can make all possible adjustments, for example, turn off 'OneDrive for Windows' automatically if the time expires, adjust sound, change default keyboard layout, browse the web with its browser, speed up apps and games, as well as disable unwanted pop-up windows, such as Windows Security, Windows Update, Start Menu etc. Sunrise also allows users to add or remove programs from Start menu, change the names of the folders and create desktop shortcuts, turn off 'Low Disc Space Notification', allow apps to move icons around and change the grid-view for files and folders, as well as remove icons from the Windows 7 Start menu. You can decide if you want to use 'Use Windows Shortcuts' and use the list of apps directly from the Start Menu or you can leave it unchecked and use the program to create shortcuts to the commonly used apps, such as Google Chrome, iTunes, BitTorrent, Steam and others. It also allows you to configure system performance settings, such as turning off 'Open in new window' and 'Open in new tab' when opening some apps, and turning on the Auto-hide feature of the taskbar. Additional security options allow you to turn off the 'Task Manager', 'Registry Editor', 'Folder Options', 'Control Panel', 'Windows Update', 'Desktop Gadgets' and 'Internet access for DRM'. Sunrise Seven requires a moderate amount of system resources, but didn't cause any problems during our tests. Since it provides many functions, you should like its usability and efficiency. However, it doesn't offer you a search function. Rating:]]> News1MobileBluetooth Volume MicrophoneSunrise Seven is a practical piece of software that allows you to make some modifications to Windows 7. It can be easily installed and handled. The interface of the tool is clean and intuitive. So, you can make quick adjustments, such as configuring the start menu and shell, placing a small space between icons, turning off hibernation mode, removing the arrows from the shortcuts icons, as well as disabling autoplay and the 'Low Disc Space' notification. In addition, you can configure some User Account Control
