This expansion pack featured a couple of new characters, new units, and a gameplay change that many fans didn't like. In addition, this expansion pack included a larger campaign, in which the player must fight to end the reign of chaos, seek out the temples of the old gods, and find the many secrets of the world. The expansion pack also introduced achievements that allow players to earn trophies and win awards.

Achievements are different than normal levels, in that players must obtain them within a certain timeframe or by achieving certain objectives. In addition, a lot of additional content was added to the game. Changes included in this expansion included the addition of new units, new maps, an improved level cap, and a new covenant, the Darkmoon Faire. The gameplay of "Reign of Chaos : The Frozen Throne" is similar to the gameplay of Warcraft III: Reign of Chaos. Instead of a sprawling campaign, this expansion packs featured an interesting new story and new missions for players to play through. Similarly, the gameplay in this

expansion pack is different from the gameplay of Warcraft III: Reign of Chaos. For example, players can now choose a specialization for their hero. In addition, while characters in "Reign of Chaos : The Frozen Throne" are able to choose and use spells, heroes in "The Frozen Throne" have a different arrangement
