☒ Your investment information is kept in one place. PPM is a software tool for managing your investments and keeping track of all important details about your stocks, bonds and mutual funds. PPM eliminates the drudgery of investment record keeping by maintaining records of stock, bond and mutual fund transactions and automatically computing capital gains and losses using your choice of IRS approved accounting methods. PPM also tracks cash accounts, other assets and liabilities along with investment income from interest, dividends, rents, royalties, etc. ☒ PPM helps you manage investments by maintaining separate accounting for up to 999 different portfolios. It is easy to set up portfolios for retirement planning, children's college funds, brokerage accounts, what-if analysis and much more. The report generator lets you customize each report to include any combination of portfolios over any range of dates. ☒ PPM keeps you informed on the performance of both individual investments and entire portfolios. It automatically computes both the dollar value and annualized yield of unrealized capital gains, so you can quickly tell the winners from the losers. And PPM tracks and charts the net worth of your portfolios, so you will always know if you are meeting your investment objectives. ☒ Version 7 includes built-in capabilities for downloading current and historic stock quotes from free internet data services. All you need is an internet connection. Limitations: ☒ 30 days trial ☒ Nag screen

How To Be Successful With Leverage In Forex Trading What if there was a way to make money trading the forex market without having to spread yourself too thin? What if you could do it by trading with leverage and also utilizing the... What if there was a way to make money trading the forex market without having to spread yourself too thin? What if you could do it by trading with leverage and also utilizing the experience and expertise of other CFD Traders. How would your trading be? **DISCLAIMER:** This video and description contains information about trade management that is not suitable for any person without understanding their needs. Traders must verify their own requirements and accept full responsibility for any decisions they make. New Forex Investing Classes - Money MakingStrategyOnline.com Subscribe to our channel: Secrets of Leverage - How to Trade Forex

☒ Keymacro is a powerful set of macro functions for Excel, MS Word and MS Excel that enable you to automate many of the mundane and time-consuming tasks associated with tracking your investments. ☒ Keymacro is a Microsoft Excel Add-In (it must be installed on your computer first before you can use it), which lets you create fully

customized sets of pre-defined macros and apply them to text or cell contents in a single operation. [?] Keymacro is a set of powerful macro functions that automatically update key financial and economic information such as stock prices, exchange rates, interest rates, yields and real estate values. It even gives you graphical information on the relative strength of all your investments in any combination of instruments. [?] This version includes a new set of automation functions to improve on the previous version's already powerful reporting features. [?] New reporting functions include adding portfolio values to a separate report, calculating gains and losses for a selected period, creating and saving custom reports, updating totals based on new data, automatically calculating asset yields, graphing cumulative net worth changes, and setting up many other useful functions. [?] It is now easier than ever to create a fully customized set of macros by clicking on a button instead of typing in text. Limitations: [?] 6 months trial [?] Nag screen
