SysTools 2007 is a monitor and performance tool that allows you to fix shortcuts, fix auto start programs, clean disks and registry, defrag system RAM and stay informed about HDD performance. Featuring the latest edition of the constantly improved SMART Monitor, you can use five other newly developed tools in one package to clean and monitor your system. Here are some key features of "SysTools": ⦁ Shortcut Fixer: find and fix or delete invalid shortcuts ⦁ Disk Cleaner: find junk files, empty files and folders, and remove IE tracks ⦁ Registry Cleaner: find and delete invalid registry entries ⦁ Startup Manager: add, fix or delete all startup program entries ⦁ SMART Monitor: keep an eye on up to 4 IDE HD drives for failure protection ⦁ RAM Plus: defrag your system RAM for maximum performance The team that put on the College Football Playoff a few years ago had the benefit of having a year of knowledge to build on. Now, the folks tasked with getting the sport ready for another playoff have only the blueprint to guide them. Speaking at the 2015 Football Business Leaders of America convention on Friday, CFP executive director Bill Hancock and his staff provided insight on how they will try to move the sport forward. Hancock, in his keynote speech, said that while everyone is operating on the same basic principles, there is a growing recognition that there will be "unwritten" rules. In other words, there are new wrinkles that the sport will have to work through as it moves closer to its goal of being played on New Year's Day. That will mean that there will be some changes to the current postseason format that's in place for the second time in three years. "We need to figure out how to do this [playoff] in a way that benefits the game and makes it better for fans," Hancock said. The folks in charge of running the playoff made an unsuccessful bid to make the entire sport of college football the national championship game. That attempt, which took the form of a bid to change the rules of college football's bylaws, failed. While that process is over, Hancock said that there is a recognition that other changes will need to be made if the playoff is going to be successful.Q: How to pass a variable to `setInterval` function I have a setInterval() function and I want to pass a variable from a click event to the function. Here is my current code: $('.next').click(function() { setInterval(function(){ console.log('interval start');
