NYKRA is a sci-fi, post-apocalyptic puzzle, platformer game with tactical RPG mechanics. The overall storyline takes place in a fantasy-like world that went through quite a tumultuous time. An apocalyptic virus was unleashed to a substantial part of the galaxy, killing billions. A few hundred, or even a few thousand years later, we come to a scene that is identical to what's to come: The world is still recovering from the apocalypse, some good old mans are trying their best to provide stability and order to the world. But due to the massive scale of the problem, the necessary resources had to be rationed. In some places survival of the fittest still resulted in the 'better' men spreading chaos through the land. Each planet in the game is distinctive, with its own values and moral structure. So while the world is this scary, each planet is also rich with lore and charm, of which would be the world if everything wasn't being ruined by the virus. ...That is, of course, if all the planets weren't being completely obliterated by the virus. The game is being developed on top of Unity for iOS and Android devices. There is a Windows version in development. Gravity effects are now all developed via pathfinding and AI. Gameplay Features: The

emphasis of NYKRA, with all of its systems, is on concept/story and story mechanics. So the gameplay is developed around that, aiming to bring about the right 'feel' at all times. The player takes on the role of Keu, who is a being of light that was once a powerful hero. Keu is searching his home planet for his lost love, when a virus suddenly attacks the planet. He has to travel through 7 other planets to find a way back home and save his friends, and ultimately his people. Keu will have to travel through the 'post-apocalyptic' world, solving puzzles and making use of interesting mechanics with multiple uses and drawbacks. In NYKRA, the player can advance through the game, level by level, revealing more about the 'dark virus' and the people that are affected by it. The story is complex and immersive, requiring the player to think strategically about their decisions. Each of the 7 planets are visually distinct in a different way, with its own environment and story, though the game doesn't stop there. There are further planets, further stories, that can

RPG Maker VX Ace - MT Tiny Tales Character Sprites NPC Advanced Features Key:

- Quick time event
- Incredibly speedy characters
- Easy win, hard loss ratio

RPG Maker VX Ace - MT Tiny Tales Character Sprites NPC Advanced Crack +

Play Bike Race from Youdagames!In this game you can become the best bike racer in the world. On your way, you have to try to beat all the records of time and distance, the longest bike race and speed, the steepest slopes, the best corners and other and more. Play online bike racing free. This is the fastest video game in the world. You have a hovercraft and your job is to drive into the red rectangles to collect points. Try to be fast and cover the shortest distance in one go. You can even change the gravity by using your left and right arrow keys. Play online hovercraft racing free. Features:* High-resolution graphics for your PC or Mac* Improved gameplay and new and improved controls* New game modes* New gameplay levels* Customizable game play settings and levels Red Baron is a revolutionary air combat simulation that puts you in the cockpit of a World War I biplane fighter. Battle through 4 different game modes:Classic, First Person, Missions and Battle.In the classic mode you take off and fly, enemy

planes fly around you and your plane fights them with your gun. In the first person mode you move the camera with the arrow keys and in Mission mode you have to fight to complete a set of objectives to defeat all enemy planes. In Battle you have 3 opponents, each of them starts out with 3 different planes. Your job is to destroy them all. Your plane can be upgraded with guns and different stats. You can also make it invincible and invisible to all enemy planes. In World War I there were over 60 different air forces. In this game you can fly with and against them in 3 different game modes.In Classic mode you have to attack enemy planes in a match against 3 other players or AI. After each match you get points, these points go towards the goal you want to achieve, it can be to attack 100 planes, 100 players, 100 tanks or 100 ships. To make this realistic every plane has a location to fly to, a strength and a number of hits it can withstand. The stronger your plane the higher it is positioned in the list, so you have to go for the weaker planes first. Every plane also has its own "weaknesses".A major element is the Weather System. It affects your plane in different ways, for example a rainy day gives you a lower altitude and a higher flotation level. In First Person mode you have to fly your plane without any controls, this
