Direct link to Universal Type Server 1.5 Final from Rapidshare: Download Universal Type Server 1.5 Final.Q: Upload file using Django Rest Framework I am using django rest framework and I am trying to upload a file using the following code:

```
import requests
def upload_file(request, unique_identifier):
    if request.method == "POST":
        unique_identifier = request.FILES['file']
        print unique_identifier
        print request.FILES['file']
        unique_identifier.read()
        unique_identifier.save(str(unique_identifier.name))
        return My serializer:
from django.core.serializers import Serializer, Deserializer
from django.http import Http404
from datetime import datetime
from faker import Faker
import requests
class TestSerializer(Serializer):
    unique_identifier = Serializer.CharField()
    name = Serializer.CharField()
class TestModelSerializer(ModelSerializer):
    class Meta:
        model = TestModel
This is the code I have in my views.py
from rest_framework import status
from rest_framework.response import Response
from b7e8fdf5c8
```

Universal Type Server [Mac/Win]

Use Universal Type Server to keep all the fonts installed on your computer and on all your clients up to date and available to you any time you want. Universal Type Server allows you to keep your fonts managed in a way that they are easily found and used when you need them. Unlimited Font Sync: Universal Type Server enables you to edit fonts from any computer and keep all fonts updated on all clients. No configuration needed. System-Wide Fonts: Universal Type Server synchronizes the fonts to the network, allowing you to edit them from any system to any other system on the network Automatic Sync: Once a client is upgraded to a new version of Universal Type Server, there is no need to change the client anymore Support for Unicode: Universal Type Server supports all fonts available on your computer. Unicode support is extremely important, in fact. It's what makes the fonts in UTS available to you Wide Range of Fonts: Universal Type Server supports almost all fonts that are available on the internet. This means you will be able to sync your existing fonts with your new, updated and made available fonts Multiple Client Connections: Universal Type Server allows you to connect to your clients using multiple methods. Up to 20 clients are supported by the application, and they can be accessed via Active Directory, LAN, VPN, FTP, Direct IP Connection, TAPI, RDP, HTTP, POP3 and IMAP servers Supports Unicode Fonts: Unicode fonts are the new wave in the area of typefaces. Universal Type Server has been tested with all the fonts that are commonly available. Also, they can be used with the application. Unicode is more than just a representation of the letters. It includes a vast set of data that is essential for font and graphic designers. It also has its own character set for the letters and other symbols, which makes it easier to create and manage a lot of fonts Supports Legacy Fonts: Universal Type Server supports fonts from previous operating systems. It helps you to keep all your fonts available, even if you're using an operating system with limited font support Responsive Design: Universal Type Server responds to the user's request. The client software is responsive and automatically adjusts the look and feel of the interface to fit the device used by the user Specifications: 5 KB How to Get a Registration Key If you do not have a Universal Type Server License key or an Installation Key (Windows Vista and Windows XP), you can download a key from our website. When
