Does anyone know where to get this for Windows and.Q: Remove unused CSS from media query I have an image logo, which I want to be displayed in portrait mode on smartphones and landscape mode on larger devices. I used media queries to hide the logo on certain devices. @media all and (max-width: 480px) { #logo { display: none; } } @media all and (min-width: 481px) { #logo { display: block; } } @media all and (max-width: 1023px) { #logo { display: none; } } @media all and (min-width: 1024px) { #logo { display: block; } } The problem with this code is that the desktop/landscape images I have in the same folder (but not mentioned in the above code) get picked up as well. How can I target only the mobile version, but not the desktop versions? A: Add a "rem" as well. The min-width does not include the standard browser padding. You need to take that into account. @media all and (max-width: 1023px
