

theres no easy way of purchasing the oem software online. the only option for this is to do the following: click here for a full list of oem part numbers. order a license directly from siemens using the number 97680301. the license will cost you about \$500.00 but is a one time payment. once the software is installed onto your computer theres the usual network issues with installing opc servers and opc clients. with the step 7 package it is really easy to get opc going because there are always a lot of example server and client code on the web. theres lots of code example on the net and theres even a good tutorial on this site for a beginner like yourself. hint theres lots of scada on the net. if that is your thing. when youre ready to use the manuals check out the following link: <http://www.teleman.com/resources/siemensstep7step7ite.htm> it comes with a nice flowchart that shows you how to navigate the software. to get started quickly you should read through the first few chapters. next click on the link below that says step 7 teach yourself guide oem manual support for step 7 is very limited. if youre looking to get the most current information then you should keep on reading. most everyone wants support for the most current version of the software. there are two ways of getting this type of support. the first and most obvious is to do an upgrade. the cost of an upgrade to a new software release is high. theres no guarantee that the oem will honor your license. so you should plan on doing only small/maintenance releases. the other method for support is to do a support contract. the support fee is usually less than an upgrade but there is no guarantee of support. contracts last from one to five years. we do not recommend support contracts.
