Logicmaster 90-30 V9.05 Software Download

I need the LM90.exe program to get the program out of the old PLC 90-30. Proficy ME will not communicate, and I know I have run into this

... I can't find a program with that name. I have tried several others (LM90, LM90_setup, LM90_control, LMS90_setup) but they either don't work or won't tell me where to find it. Is there any way to download the program to the PLC to use it? I have read the user manual, so I know I can load it through the command line. I can't

get it to work because I
can't find the file. Any
help? Thanks dd2bc28256
